AWAY ROTATIONS AND PREPARING FOR CLERKSHIPS

- ▶ AWAY ROTATIONS / AAMC
- ▶ HOW DO I OBTAIN HEALTH CLEARANCES FOR FACILITY SITES?
- ▶ KAISER HEALTH AND SAFETY VERIFICATION FORM
- ▶ HOW DO I OBTAIN A QUANTITATIVE HepBsAb SEROLOGY?

Misconception of TB Clearance

“You need to submit your TB update the month it is due”

Clearance is constantly evolving depending on when you start at the facility and/or where you go.

Several facilities require TB clearance valid of 9+ month or 3+ month

Know when your last TB or IGRA, T spot, Chest X-ray on file is so you will be prepared if you have to submit a more recent one

2-Step TB generally will require 4 visits

- 1st Visit: Receive first test placement
- 2nd Visit: Reading of first placement within 48 – 72 hours
- 3rd Visit: Placement 1 – 3 weeks following the first placement
- 4th Visit: Reading of second placement within 48 -72 hours

All forms require the dates for each visit

Tuberculosis Screening History

Acceptable annual TB updates, IF a 2-step is already on file: 1-step TB, IGRA QuantiFERON, or T-Spot test

Chest X-ray is only required if you are having symptoms or recently tested positive

State of Hawaii TB Questionnaire will need to be completed for AAMC (only if TB Positive)

JABSOM HOME Clinic

Fall – Influenza Clinic

Spring – TB Clinic

Please note the HOME clinic does not immediately send us your documents

Best to always make sure you have your own copy of the immunization

Immunization by Private Insurance

For most insurances, you may go to any pharmacy to have it administered

For Kaiser & Tricare you may need to see if their RX plan will allow for you to have an immunization at any pharmacy

Note: Hep B Quant. Serology is no longer administered by Kaiser.

CVS, Time's Supermarket, Safeway, Walmart, Costco, Sam's Club

X-Ray, IGRA or T-spot, Serology

Will need appointment with your PCP, UH health services, CVS minute clinic, or urgent care clinic based on your insurance coverage

Serologies - Will always need a lab order from an APRN, PAs or MD

Some places administer these at a low cost but not free

Insurances may not always cover

Hepatitis B Vaccination

Best practice is to always complete the 3-shot Engerix-B vaccination series

After taking HepB vaccination, will need serology result to be above 10 mIU/mL

If below, could either retake 3-shot series or 2-shot HepB Vaccine (ie Heplisav-B)

If your 2nd series of HepB titers is still under 10 mIU/mL, may be considered a non-converter. May need an “acknowledgement of non-responder status” ltr/document before clinical placements.

Documentation Tips

BE PREPARED

Recommend to take photos, scan your immunizations – send them to the cloud, forward them to your PCP, access via your Mychart or online EHR portal for your records

For serology lab results make your own account to access your results for DLS or Clinical Labs

BE DETAILED

TB updates, please make sure you have the placed date, read date and mm in duration on the documentation

Facility immunization forms will require all these details

Need your full name and DOB on all documentation

AAMC Immunization Form Submission process

1. Complete the top portion of the form
2. Submit immunization/serology updates
3. Quantitative HepBsAb serology is required > 10 mIU/ml
4. Skin test or IGRA should not expire during proposed elective rotation dates or must be updated with institution prior to rotation
5. Processing time is 7 – 10 business days after submission

AAMC Standardized Immunization Form

Last Name:		First Name:		Middle Initial:	
DOB:		Street Address:			
Medical School:		City:			
Cell Phone:		State:			
Primary Email:		ZIP Code:			
Student ID:					

MMR (Measles, Mumps, Rubella) – 2 doses of MMR vaccine or two (2) doses of Measles, two (2) doses of Mumps and (1) dose of Rubella; or serologic proof of immunity for Measles, Mumps and/or Rubella. Choose only one option.				Copy Attached
Option 1	Vaccine	Date		

More specifically what is required

Feb – April is when submission for the away rotations begins

Current TB/IGRA, T Spot or TB Screening forms and Quantitative HepBsAb serology

Other states and facilities may have additional vaccine requirements

ex: Meningococcal has to be within 5 years, East Coast States have required this vaccination

Final Reminders

Email JABSOMMR@ucera.org (preferably with your hawaii.edu email) to request the AAMC form or any immunization form to be completed

Your records will be reviewed and processed

Processing time is 7-10 business days after submission of required documents

You may also submit any other facility immunization forms for us to complete (ex: university forms)
