

FORM P-3

CHEST X-RAY & POSITIVE PPD FORM

Requirement:

You must clear the NAWSON Tuberculosis (TB) requirement by providing evidence of a 1) positive TB in your medical history, 2) a recent "Clear" or "Normal" Chest X-Ray, and 3) a completed Form D (TB Monitoring Form). If you have a positive QuantiFERON TB-Gold (QFT) or T-SPOT TB Test, then provide a copy of the lab report (make sure your lab report has your name, the date the sample was collected, and the interpretation of the results or key to interpret the results).

Note, if you go to Lanakila or any of the state PHNs, they will not fill out this form. They will issue you a state TB Chest X-ray card or letter, which is perfectly acceptable. Also, if they have a record of your positive PPD, they will also issue a card or letter (just make sure it has your name, the date the PPD was given, and the mm reading of the induration).

Student's Name: _____

Tuberculosis (TB) Clearance	By Whom	Test Dates		Results (Required)
		Given on	Read on	
Chest X-Ray (CXR): You must complete all 3 steps : 1. Provide the date (given and read) & size of a Positive PPD or the lab report. 2. Provide the date of your most recent clear/normal CXR. If your last CXR was done BEFORE 01/01/2023 , then you MUST get a new CXR. 3. Fill out & submit Form D.		+ PPD		
		CXR		mm
